

**Dr. Jeffrey D. Fisher, Director**  
University of Connecticut  
Center for Health, Intervention  
& Prevention (CHIP)  
Professor, Psychology Department  
*jeffrey.fisher@uconn.edu*  
860-486-4940

## **Biography**

Dr. Fisher has published extensively on factors associated with HIV risk behavior and antiretroviral non-adherence, and has designed, implemented, and evaluated effective HIV risk behavior change and adherence enhancement interventions. He has authored theories of the dynamics of behavior in each of these domains. Dr. Fisher has lectured and consulted internationally on HIV preventive behavior and antiretroviral adherence, and was named to the Center for Disease Control's AIDS education programs evaluation committee. He has served on the National Institute of Mental Health Psychobiological, Biological, and Neuroscience subcommittee, the Mental Health Acquired Immunodeficiency Syndrome Research Review committee, and on the editorial boards of various journals. Dr. Fisher is a fellow of Divisions 8, 9, and 34 of the American Psychological Association, and of the American Psychological Society. He received his doctorate from Purdue University in 1975.

## **Current Research Interests**

Dr. Fisher's research to date has involved gay men, injection drug users, heterosexual adolescents, and individuals who are HIV infected in both civilian and military populations. He has been awarded six major NIMH HIV risk reduction grants since 1989, totaling over \$20 million as PI. His work also focuses on health behavior change in general. His research interests include: the initiation and maintenance of health behavior change, especially HIV risk behavior change and increasing medical adherence; pro-social behavior, especially recipient reactions to help and help seeking; and environmental psychology.
